retold. The Javanese legends are written in poetic form and relate the stories as occurring during the lifetime of the Prophet. This manuscript, written in the Javanese and Pégon (Arabic–Javanese) alphabets, contains a number of the main episodes in the tales of Hamza. The codex offers a prime example of the art of book illumination that flourished during this period in Yogyakarta, a city and sultanate on the Indonesian island of Java and a traditional center of Javanese culture. Particularly remarkable are the various highly symbolic wadana, ornamentally decorated pages at the beginning or the end of separate text passages. These are often illustrated with architectural motifs representing temples. Unfortunately, several

pages of the manuscript have been obliterated by ink corrosion. The manuscript is at the Bavarian State Library in Munich, Germany. // Autor: Bayerische Staatsbibliothek, Oriental and Asia Department // Datum: 2019

roulette. It guides readers through the mathematical principles that underpin these games and their different variations, providing insights that will be of huge interest to gamblers, casino managers, researchers, and students of mathematics. Features A valuable teaching resource, replete with exercises, for any course on gambling mathematics Suitable for a wide audience of professionals, researchers, and students Many practical applications for the gambling industry Mark Bollman is Professor of Mathematics and chair of the Department of Mathematics & Computer Science at Albion College in Albion, Michigan, and has taught 116 different courses in his career. Among these

courses is "Mathematics of the Gaming Industry," where mathematics majors carefully study the math behind games of chance and travel to Las Vegas, Nevada, in order to compare theory and practice. He has also taken those ideas into Albion's Honors Program in "Great Issues in Humanities: Perspectives on Gambling," which considers gambling from literary, philosophical, and historical points of view as well as mathematically. Mark has also authored Basic Gambling Mathematics: The Numbers Behind the Neon, Mathematics of Keno and Lotteries, and Mathematics of Casino Carnival Games.
